(with Latin American operations)

How we are creating value

With approximately 66,000 kilometres of proprietary fibre assets in Spain and Latin America, Ufinet has a unique network that benefits from long-term contracts and strong customer loyalty. Our TMT and Iberian teams identified Ufinet as an opportunity with strong growth potential through expansion into adjacent Latin American countries, investment in metropolitan fibre networks and extension of the services offered by Ufinet in Spain. We have drawn on considerable expertise accumulated in past successful investments in cable operators Ziggo, Numericable (in the Netherlands and France, respectively) and, more recently, hosting and domain services company HEG.

Following our carve-out of Ufinet from its Spanish utility provider parent, the business has developed substantially.

Developments in 2016

Ufinet continued its strong performance under Cinven's ownership throughout 2016.

Ufinet completed a total of six add-on acquisitions since 2015, including four in 2016. The acquisition of Latin American B2B managed telecoms services business, IFX, which was signed in December 2016 and completed in March 2017, enables Ufinet to enter the attractive B2B telecoms market.
