

About us

Cinven is a leading European private equity firm with global reach. Since inception, our singular focus has been on responsibly investing in companies in order to create international champions. We have €11.5 billion in assets under management.

Our Investment team operates on a combined sectoral and regional basis to identify high growth companies that have the potential to generate strong returns and tangible stakeholder benefits. Our Portfolio team, based in Europe, Asia and the Americas, supports these companies through operational improvement and, very often, international expansion.

After several years of engaged ownership and building value, we sell our stakes in each company and return the proceeds to investors in Cinven funds, such as corporate and public pension funds, sovereign wealth funds, insurance companies, endowments and foundations.

Since 1988 we have invested in 110 companies with an aggregated enterprise value of €84 billion*, and have realised proceeds of €25 billion*.

* To end December 2014
