How we are creating value

Northgate provides a variety of niche software applications across a diversified mix of public sector customers, including local and central government, police and healthcare. We acquired the business in 2014, through a carve-out of the business from its parent, Northgate Information Services. In addition, with substantial investment in a modern, Software as a Service (SaaS) platform designed for public services, the company has been assisting with the digitisation of public sector information.

Developments in 2016

The business performed less well than expected and therefore Cinven has strengthened Northgate's management team with the appointment of Steve Callaghan as CEO in 2016, an individual with significant experience in a number of private equity transformation roles. The company also appointed a new Chairman, CFO, CTO and COO in addition to a new Head of Local and Central Government.
